

DARRIUS BROWN | SOFTWARE ENGINEER

I am a self-motivated software engineer with solid communication, a passion to create high quality code, and the ability to adapt well in a team environment. Being a former Team Leader in the restaurant business taught me the value of collaboration and communication. I strive and am excited to learn new things everyday and using a growth mindset pushes me to further develop myself. I enjoy solving complex problems and providing solutions for the people around me so I can help others in need.

Skills

Languages - Java Script, HTML, CSS, Python, SQL, Mongo, JSON, Typescript, EJS

Database - MongoDB, SQL, PostgreSQL, REST API, JSON API,

Libraries and Frameworks - React, Express.js, Django, Bootstrap

Enterprise Tools - Visual Studio Code, Github, Postman, Microsoft Office, Slack, Zoom, Discord, Google Chrome (Dev Tools)

Software Development Projects

Play² | [Github Frontend](#) | [Github Backend](#) | [Netlify Frontend](#) | [Heroku Backend](#) - Web Application to play a variety of games based on one board 7/2022

- Built a full stack application utilizing **React** and **Django** with full create, read, update, delete (CRUD) operations hitting all RESTful API calls.
- Made RESTful API fetch calls to a **Django** backend handling all create, read, update, delete (CRUD) operations, and tested all backend routes during development using Postman.
- Implemented user authentication using a JSON Web Token authentication plugin for the Django REST Framework, **Simple JWT**.
- Utilized **Styled Components** in **React** to write web styling in **Javascript** and apply styling across multiple **React** components more efficiently

Chat Anime | [Github](#) | [Heroku](#) - Social media type web app to chat about my favorite anime. 4/2022

- Utilized a MERN stack (**MongoDB, Express, Node.js**) to build a full stack web application. With full create, read, update, delete (CRUD) operations hitting all **RESTful API** calls.
- Made RESTful API fetch calls to an **Express, MongoDB, Node.js** backend handling all create, read, update, delete (CRUD) operations, and tested all backend routes during development using Postman.
- Used Mongoose to define schemas for **MongoDB** collections.
- Implemented EJS to organize and display the visual aspects and provide style to these aspects.

2048 | [Github](#) | [Netlify](#) - An easy to play math/puzzle web game. Create 2048 and you win 3/2022

- Leveraged embedded **Javascript, Vanilla Javascript, CSS3, HTML5, DOM manipulation**, with partials to organize and display the visual aspects.
- Utilized Git control during the production of the application with frequent commits until deployment.
- Implemented ES6 tagged template literals with **Styled-Components** along **CSS3** to provide style and grid layout.

Professional Experience

Fresh Foods Associate | WalMart | Corona , CA

6/2019 - PRESENT

- Trained 15 employees how to use WalMart technology, accurately keep track of inventory, donate and dispose of unwanted merchandise, and correctly stock fresh food items using the FIFO method.
- Designed feature tables and feature doors weekly to help promote a product, sell a surplus of a product quickly, and increase fresh food departments sales.
- Provided customer service daily to 10 - 20 clients to ensure their problems were always resolved.

Team Leader | Jack in the Box | Corona, CA

10/2016 - 1/2020

- Trained 3 to 5 employees monthly in best practices to operate fryers and the grill, operate cash registers, and how to provide great customer service and improve communication skills.
- Coordinated staff positions and break schedules for a staff of 5 to 8 employees in an agile environment to ensure best staff levels to deal with specific busy hours and keep all work positions running smoothly.
- Established and recorded sales, speed of service, and customer service goals daily to evaluate which of these three aspects needs the most focus during the shift and create new goals for future shifts.

EDUCATION

General Assembly | Remote

1/2022 - 7/2022

Software Engineering Immersive

Full-stack software engineering immersive student in an intensive, 24-week, 450+ hour program focused on product development fundamentals, object-oriented programming, MVC frameworks, data modeling, and team collaboration strategies. Developed a portfolio of individual projects and collaborated in a group project.

California State University Los Angeles | Los Angeles, CA

Graduated 2019

Bachelor of Science in Business Administration, Accounting Option
